

Desktop Member to Member Transfers – Code Creation

A Member to Member (M2M) Code is a unique identifier used to securely receive transfers without sharing sensitive account details.

Member to Member Code Creation Step-by-Step

Use the following steps to create a M2M Code.

Step	Action
1	Click the Make a Transfer menu at the top of the screen.
2	Click the Member to Member Accounts hyperlink at the left of the screen.
3	Click the Create Code hyperlink at the top of the screen.
4	Click the Select Account drop-down arrow and choose the Account to which you want to allow transfers.
5	Optional: Click the Copy hyperlink to copy the code.
6	Click the Save Code button.
7	A confirmation message appears at the bottom of the screen to confirm a code was created.
8	Optional: To delete a code, click the Delete hyperlink to the right of any code.
