Mobile Member to Member Transfers –
Code Creation

digital banking
step-by-step guide

A Member to Member (M2M) Code is a unique identifier used to securely receive transfers without sharing sensitive account details.

Member to Member Code Creation Step-by-Step

Use the following steps to create an M2M Code.

Step	Action
1	Tap the **Transfer** menu at the bottom of the screen.
2	Tap the **Add a Member to Member Account** hyperlink at the bottom of the screen.
3	Tap the **Create Code** hyperlink at the top right of the screen.
4	Tap the **Select Account** drop-down arrow and choose the **Account** to which you want to allow transfers.
5	Optional: Tap the **Copy** hyperlink to copy the code.
6	Scroll down and tap the **Save Code** button.
7	A confirmation message appears at the bottom of the screen, confirming the Member to Member code was created.
8	Optional: Scroll down to **My M2M Codes** at the bottom of the screen to view any codes you've generated.
9	Optional: To delete a code, tap the Delete (🗑) icon to the right of any code.
